# EASY LAWN

*...low maintenance, no hassle!*

## SUITABILITY

Suitable for the busy gardener who is looking for a lawn which remains green for longer and requires minimum maintenance. Perfect for wear tolerance, drought and shade, it can be used for new lawns or oversown in to an existing lawn.

## DESCRIPTION

Easy Lawn is a special mix of seed requiring very little maintenance. Modern grass seed varieties are combined with tiny microclovers to produce a beautiful green lawn all year round.

## HOW DOES IT WORK?

Microclovers produce their own natural fertiliser which feeds the grass to keep it healthy and green. At the same time, their deep roots reduce the need for watering. The resulting dense growth inhibits weed establishment while providing an attractive lawn.
